PROFESSIONAL SUMMARY

Advanced Computer Engineering student with hands-on experience building full-stack applications using C# / ASP.NET Core 8 and React. Proficient in Clean Architecture, SOLID principles, and REST API design. 5+ years of customer-facing experience at Amazon developed strong problem-solving, communication, and process improvement skills. Bilingual (English/Spanish) professional seeking a junior software development role.

TECHNICAL SKILLS

Languages	C# (primary), Java, PHP, SQL, HTML / CSS / JavaScript
Frameworks	ASP.NET Core 9/8, React 18 + Vite, Entity Framework Core 9, WinForms
Architecture	Clean Architecture, SOLID Principles, MVC, REST APIs, TCP Sockets
Auth & Security	JWT + Refresh Tokens, BCrypt.Net, OTP Email Verification, MailKit, SendGrid
Databases	SQL Server 2022, Entity Framework Core Migrations
Testing	xUnit, Moq, FluentAssertions
DevOps & Tools	Docker, GitHub Actions CI/CD, Azure App Service, Git, Swagger / OpenAPI
Systems	Linux, Windows, PC/Server Administration, Routers, Switches
Languages	Spanish — Native English — Professional Proficiency

TECHNICAL PROJECTS

TurnOS — Cloud-Based Appointment Management System [\[GitHub\]](#)

C# / ASP.NET Core 9 · React 18 + Vite 5 · EF Core 9 · SQL Server 2022 · Docker · GitHub Actions · Azure

- Built a full-stack SaaS-style appointment system for small businesses (barbershops, clinics, workshops) with multi-role auth (Admin, BusinessOwner, Client), smart slot booking with real-time availability, and complete appointment lifecycle management (Pending → Confirmed → Completed / Cancelled).
- Structured backend as 4 separate .csproj projects following Clean Architecture (Domain, Application, Infrastructure, API) with strict dependency rule — no outer layer imported by inner layers.
- Implemented CI/CD pipeline with GitHub Actions: automated build, 19 unit tests (xUnit + Moq + FluentAssertions) covering Auth, Business, and Appointment services, and deployment to Azure App Service on push to main.
- Containerized with Docker/docker-compose, integrated SendGrid for email notifications (confirmations/cancellations), and built React frontend with Axios JWT interceptor, protected routes, and owner dashboard.

AuthProject — Full-Stack Authentication System [\[GitHub\]](#)

C# / ASP.NET Core 8 · React 18 + Vite · JWT · SQL Server · Entity Framework Core · MailKit

- Built a complete auth system with registration, JWT + Refresh Token login (1h/7d expiry), 6-digit OTP email verification via MailKit, and password recovery — all in Clean Architecture with 4 layers.
- Applied all 5 SOLID principles with separated interfaces (IUserRepository, IJwtService, IEmailService), BCrypt hashing (work factor 12), global exception middleware, and CORS whitelisting. 8 endpoints documented in Swagger.

BUSUH — Distributed Bus Ticket Reservation System [\[GitHub\]](#)

C# / .NET 8 · WinForms · TCP Sockets · Custom Frame Protocol · Multithreading · MVC · SOLID

- Architected a distributed system of 3 WinForms executables (Terminal Manager, Reservation Server, Client) communicating over a custom TCP frame protocol — 100% C#, no external dependencies.
- Built a multi-threaded reservation server with thread-safe data structures to prevent double-booking, and real-time interactive seat maps in the client app following MVC pattern.

Cinema REST API — Movie Theater Platform Backend [\[GitHub\]](#)

C# / ASP.NET Core · REST API · SQL Server · Entity Framework Core

- Developed a RESTful API with full CRUD for movies, theaters, showtimes, orders, and ticket management, applying layered architecture and Entity Framework Core for data access.
 - Implemented JWT-based authentication and role authorization for endpoint security. Collaborative project (fork-based workflow) with 7 commits across contributors.
-

PROFESSIONAL EXPERIENCE

Customer Service Associate — Retail

Amazon | Jan 2022 – Present

- Resolved complex order issues end-to-end, coordinating with internal systems and third-party vendors while maintaining high customer satisfaction metrics.
- Analyzed service data to identify trends and propose process improvements across the team.

Logistics Assistant

Belina Industrial | Jan 2020 – Jan 2022

- Managed inventory control, weekly stock audits, and supplier coordination ensuring supply chain continuity.

Alexa Device Customer Service Specialist

Amazon | Jan 2019 – Jan 2020

- Provided technical support for Alexa devices: network configuration, troubleshooting, subscription billing, and device replacements — reducing repeat contact rates through proactive customer education.

Administrative Assistant

Transportes el Rayo | Jan 2019 – Jan 2020

- Coordinated logistics tracking, delivery scheduling, and inventory records with external providers.
-

EDUCATION

Bachelor of Science in Computer Engineering (In Progress)

Universidad Hispanoamericana · Expected Graduation: December 2026

Technical Certification: Information and Communication Technologies

Instituto Nacional de Aprendizaje (INA) · 2019

High School Diploma (Bachillerato)

Liceo de Miramar · 2019
